Summary

Full Stack Web Developer, creative problem solver and teamplayer, with experience in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, Database Theory, MongoDB, MySQL, Command Line and Git. Being a software engineer and learning new technologies is my passion. In a previous career, I worked in the financial industry in a sales team, which prepared me to work in a fast paced environment. With over 17 years of experience I will bring outstanding teamwork and leadership skills to my next team.

Technical Skills

Language : JavaScript

Libraries : JQuery,

Frameworks : React.js, Express, Bootstrap, Materialize.

Database : Mysql, MongoDB.

Projects

Salons-R-Us

GitHub : <https://github.com/gohucosta23/project>

Website : <https://salons-r-us.herokuapp.com/>

- Final project for UofR Bootcamp. Salon booking website that allows Salons, Professionals and Clients sign up for an account to view, manage and set new appointments.
- This was a solo project. I had about 4 weeks to finish the project and It was a great learning experience.
- React.js, JavaScript, Node.js, Express, React-Bootstrap, Multer(picture uploads), SendGrid(Send Emails), EmailJs(Contact me email), MySql Database, Sequelize.

Employee-Tracker

GitHub : <https://github.com/gohucosta23/React-Employer-Directory>

Website : <https://employertracker.herokuapp.com/>

- This is a simple application that allows Users to track the employees from a given company. Users will be able to see all employees, filter employees by Employee Id and by Role, Sort Employees by First Name and Last Name.
- This was one of the homeworks we had for the Coding Bootcamp. This was one of the first projects we did with React and is a front end only.
- React.js, Javascript

Good-To-Go

GitHub : <https://github.com/gohucosta23/project2>

Website : <https://goodtogo2020.herokuapp.com/index.html>

- We built this application thinking about social distancing in the midst of the Covid-19 pandemic. It is a curbside pick up application for a restaurant. Users can sign up, view the menu and place an order.
- This was a group project. I was responsible for the back end, building the relationship in the database, the back end code and the Javascript code in the front end.
- Javascript, JQuery, Node.js, MySQL, Sequelize, Express.

Eat-Da-Burger

GitHub : <https://github.com/gohucosta23/Eat-Da-Burger>

Website : <https://stormy-taiga-53566.herokuapp.com/>

- Simple application allows users to create a Burger and add it to the “devour” list. Once they click the burger as devoured, the burger moves to the “devoured list”.
- This was one of our homeworks for the bootcamp. This was an application to showcase the use of express handlebars.
- Javascript, Node.js, Express, Express Handlebars, MySQL Database.
